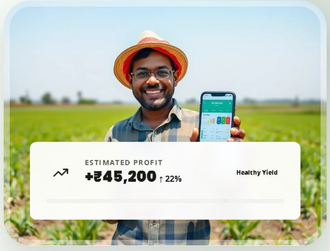
Trusted by 50k+ Farmers 98% Prediction Accuracy



Our Capabilities

Revolutionizing Farming with AI

Powerful insights tailored for the Indian agricultural landscape.
From soil to sale, we have you covered.

Explore All Features →

Crop Disease Detection

Instant diagnosis of 500+ plant diseases using computer vision. Receive organic treatment plans.

Weather Risk Alerts

Hyper-local forecasts with early warning alerts for heatwaves, unseasonal rain, and frost protection.

Mandi Price Forecasting

Know the best time to sell. Our AI predicts price fluctuations in 2,500+ mandis across India.

Income Optimization

Portfolio management for your crops. Compare profitability across different grain and fruit varieties.

Voice Farming Assistant

No typing required. Use our voice assistant in your local dialect to get instant farming advice.

Expert Community

Connect with agriculture scientists and fellow progressive farmers to share insights and tips.

How It Works

Three simple steps to maximize your agricultural potential.

01

Upload Crop Photo

Take a clear photo of your crop or soil using the mobile app.

02

AI Analysis

Our advanced neural networks analyze for diseases and pests.

03

Smart Actions

Receive localized treatment plans and the best time to sell.

Namaste Joe! Based on your soil report for Plot A, I recommend switching to organic vermicompost this week. Should I provide the mix ratio in Marathi for easier understanding?

11:15 AM • ENGLISH

Yes please, the Marathi translation would be very helpful for my field workers.

11:18 AM

नक्कीच! कंपोस्ट मिश्रण: २०% शेणखत, १०% पालापाचोळा आणि ७०% माती. (Sure! Compost mix: 20% manure, 10% mulch, and 70% soil.)

AI Agricultural Risk Alerts

3 Critical Alerts

Pest Risk: High
Current humidity levels favor Aphid growth. Inspect cotton crops today.

Irrigation Insight
Low soil moisture expected by Wednesday. Plan water distribution early morning.

Optimal Sowing
Next 48 hours provide ideal soil temperature for Mustard seeds.

Farming Strategy

Spraying Window
Optimal between 6:00 AM - 9:00 AM. Winds are below 10km/h.

Harvest Status
Wait 48 hours. Rain expected on Friday might affect grain moisture.

Soil Health
Current temp (28°C) is perfect for fertilizer absorption.

Market Price Prediction

Real-time mandi forecasting and regional analysis using KrishiAI 2.0

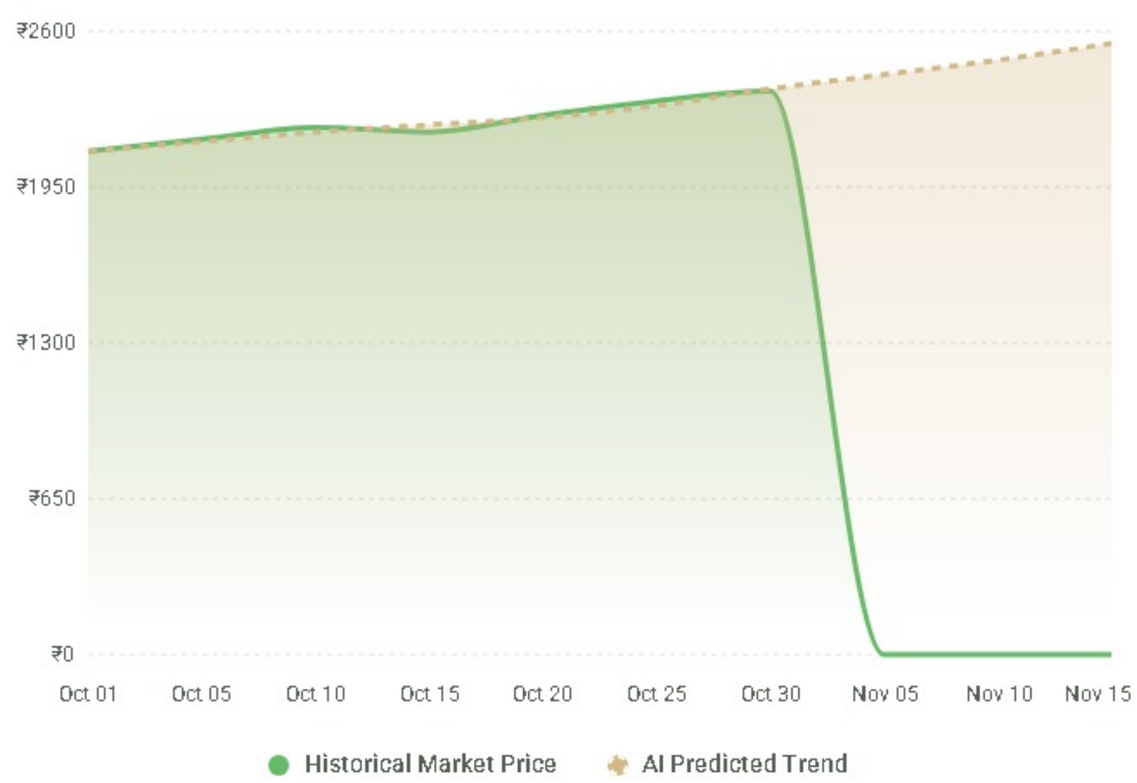
Export Report | Advanced Filters

Wheat (Common)	Rice (Basmati)	Tomato	Onion (Red)
+4.2%	+1.8%	-12.4%	+8.5%
₹2,350	₹4,120	₹1,240	₹2,890
Avg. price per quintal	Avg. price per quintal	Avg. price per quintal	Avg. price per quintal

Wheat (Triticum) Price Trends

Historical trends vs AI-predicted future values

1W 1M 6M 1Y



Crop Selection

PRIMARY CROP
Wheat (Triticum)

PREDICTED PEAK
₹2,550
Estimated to reach peak around 15th Nov. Hold until then for max profit.

BEST SELL DATE
Nov 18, 2024
Historical data suggests volume spikes often precede price drops.

CONFIDENCE
94.2%
Based on weather patterns, global exports, and local mandi arrivals.

Sell Recommendation

Current market sentiment is bullish. AI suggests a **Hold** strategy for another 12 days to gain approx ₹200 more per quintal.
